Resources:

Other: Open source RStudio Desktop & Server https://www.rstudio.com/products/RStudio/ The Data Science department has access to those 2 free software packages (and uses them to host their apps - https://www.umc.edu/apps/files/biostats/1-8-Research_viz.html), and we'd like to use them as well. We've been attempting to create a web app using R, and we'd really like to have the software on our desktops.

Comments: I put in a request on December 1st for the software, and I never heard anything after that.
