Other: I'd like to request NCBI's Blast+ version 2.6.0. In our lab, we often access NCBI for data and having the software installed on our PCs would make it a lot easier than accessing their server. It'd also give us the opportunity to performing genomics/genetics projects locally instead of on the MCSR or on NCBI's site. ftp://ftp.ncbi.nlm.nih.gov/blast/executables/blast+/2.6.0/ I'd like this software installed on all of the computers in our lab (210581, 210580, 210583, 210582). More about blast: https://www.ncbi.nlm.nih.gov/books/NBK52636/
